Mission Statement

The University of North Dakota, Bachelor of Science in Social Work Program provides students with knowledge, values and skills for generalist social work, with an emphasis on culturally responsive practice in rural communities.

Goals

- Build upon students’ liberal arts foundation to provide the knowledge, values and skills necessary for competent social work generalist practice.

- Prepare students for culturally responsive practice to rural communities.

- Prepare students for service and leadership within the community and social work profession.

- Prepare students for continued professional development opportunities.

CHAPTER 1: FIELD EDUCATION

Subchapter A: BSSW Field Curriculum and Course Objectives

Field Education is the signature way of teaching social work, according to the Council on Social Work Education. As such, the field internship experience is key to student development as a generalist social worker. The internship is typically a full-time block internship requiring a minimum of 450 hours in an approved field agency. Students enroll in SWK 481 and 483, Field Education I and II, for a total of 10 credits, and SWK 482 and 484, Field Education Seminar, for a total of 2 credits. Students may also enroll in part-time fieldwork across two semesters, though a full-time internship is preferred. Field Education and Field Education Seminar courses are co-requisites, and as such, students must pass both Field Instruction and Seminar courses in order to successfully complete Field Education. If a student does not pass any one of the field courses, the entire sequence must be repeated. The Bachelor of Science in Social Work (BSSW) Program does not grant social work course credit for life experience or previous work experience.

The emphasis in BSSW Field Education is to provide an opportunity to develop and integrate the knowledge, skills, and values consistent with generalist practice. The field internship will prepare students for professional entry-level social work practice or graduate social work education. The student will be placed in an agency setting, which supports and provides the necessary learning opportunities for the development of a generalist social work perspective. The structured learning activities of the placement will involve social work practice at various levels of intervention: individual, family, group, organization, and community. The amount of time the student is involved in the various levels will vary dependent upon the nature of the agency where they are placed. There is a clear expectation that meaningful learning assignments will occur at all the various levels of social work practice. These learning assignments should be compatible with and allow for the development and integration of knowledge, skills, and values of generalist social work practice with emphasis on the factors unique to the regional rural environment. At the conclusion of Field Education, students are expected to have achieved competency in the following practice behaviors that demonstrate mastery of the core competencies reflected in the following course objectives. The core competencies are the numbered items below in bold and the corresponding behaviors are the bulleted items beneath each competency.

Course Objectives for BSSW Field Education

At the conclusion of the BSSW Field Education, students will be able to:

1. Demonstrate Ethical and Professional Behavior.
   - Make ethical decisions by applying the standards of the NASW Code of ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
   - Use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
   - Demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication;
   - Use technology ethically and appropriately to facilitate practice outcomes;
• Use supervision and consultation to guide professional judgement and behavior.

2. **Engage Diversity and Difference in Practice.**
   - Apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels;
   - Present themselves as learners and engage clients and constituencies as experts of their own experience;
   - Apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

3. **Advance human rights and social, economic, and environmental justice.**
   - Apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and systems level;
   - Engage in practices that advance social, economic, and environmental justice.

4. **Engage in practice-informed research and research informed practice.**
   - Use practice experience and theory to inform scientific inquiry and research;
   - Apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings;
   - Use and translate research evidence to inform and improve practice, policy, and service delivery.

5. **Engage in Policy Practice.**
   - Identify social policy at the local, state, and federal level that impacts the well-being, service delivery, and access to social services;
   - Assess how social welfare and economic policies impact the delivery of and access to social services;
   - Apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

6. **Engage with individuals, families, groups, organizations, and communities.**
   - Apply knowledge of human behavior and the social environment, person-in-person environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies;
   - Use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

7. **Assess individuals, families, groups, organizations, and communities.**
   - Collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
   - Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
   - Develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies;
• Select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

8. **Intervene with individuals, families, groups, organizations, and communities.**
   • Critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
   • Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies;
   • Use inter-professional collaboration as appropriate to achieve beneficial practice outcomes;
   • Negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies;
   • Facilitate effective transitions and endings that advance mutually agreed-on goals.

9. **Evaluate practice with individuals, families, groups, organizations, and communities.**
   • Select and use appropriate methods for evaluation of outcomes;
   • Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes;
   • Critically analyze, monitor, and evaluate intervention program processes and outcomes;
   • Apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

**Subchapter B: Descriptions of Educational Roles of Individuals and Committees Involved in Student's Field Education**

Field Education is viewed as a shared responsibility of the BSSW Program, Director of Field Education, field faculty, faculty field liaisons, field education seminar instructors, field agencies, field instructors and students. Each of the components contributes to the process of establishing and maintaining opportunities for field learning. The field internship emphasizes the student's ability to apply theoretical concepts and knowledge to practice situations. Field Education is distinct from job training, volunteer experience, or apprenticeship because it is designed to provide a broad, integrated education; i.e., the ability to know why a specific professional response to a situation is chosen from a variety of competing responses. A brief description of the responsibilities for the various units and persons involved in Field Education follows.

**Section 1. Department of Social Work**

The BSSW Program agrees to support Field Education that serves as the capstone experience for social work students, and that integrates all social work required coursework into the practice experience. The Department of Social Work through the Chair provides coordination of Field Education, field education seminar instructors, assignment of a faculty field liaison,
access to qualified placement agencies and field instructors. The BSSW Program commits to receive feedback for continuous program improvement.

Section 2. Director of Field Education

The Director of Field Education is responsible to recruit, approve and work with agencies interested and willing to supervise students. The Director of Field Education provides agencies with an orientation to Field Education, shares information about the curriculum, and organizes workshops to enhance the supervisory knowledge and skills of field instructors. The Director of Field Education oversees the functioning of the faculty field liaisons and field education seminar instructors. The Director of Field Education also provides assistance to students, field instructors, faculty field liaisons and field education seminar instructors whenever needed.

Section 3. Field Faculty

Field faculty includes the Director of Field Education and other faculty who are assigned to work with Field Education as part of their deployment.

The Director of Field Education and/or field faculty will work with students to facilitate the application process, assess readiness and explore options for student internship sites. The Director of Field Education and/or field faculty will share information about prospective field students with the field instructors and facilitate the initial interview.

Section 4. Faculty Field Liaison

The faculty field liaison is the person assigned as the university contact for the student and field instructor when a student is completing a field internship. The faculty field liaison assists the student by: (a) acting as an advisor about field experiences, including development and approval of the student Learning Plan; (b) acting as a teacher by serving as a role model and assisting the student to develop ways of integrating school and field learning; (c) acting as a mediator by assisting in the resolution of problems between field instructors and students; and (d) acting as an advocate by advocating for students as needed. The faculty field liaison is also responsible for recommending the academic grade for the Field Education course based upon consultation with the field instructor, evaluation of field assignments, and review of the midterm and final student evaluations.

Section 5. Field Education Seminar Instructor

The field education seminar instructor is responsible for conducting the scheduled field education seminars for students enrolled in Field Education. These seminars are designed to facilitate the integration of classroom instruction with practice, help the student process concerns and/or needs relative to the internship experience, and provide feedback to students regarding ideas, information and assignments shared in the field education seminar sessions. The field education seminar instructor will evaluate and share with the Director of Field Education both the students' abilities to articulate the integration of theory and practice and
any special concerns students might have about their field internship experience. The field education seminar instructor assigns a grade for the seminar class.

Section 6. Field Agency

The field agency is expected to allow the field instructor sufficient time for Field Education responsibilities: (a) make available learning tasks for the student which will meet their educational needs; (b) make available suitable space and working facilities for the student, consistent with what is considered necessary for the proper functioning of any staff member; and (c) provide transportation or to reimburse for travel expenses incurred in the course of carrying out agency responsibilities.

Section 7. Field Instructors

The field instructor is expected to carry primary responsibility for the instruction of the student although other staff members may participate in the educational process and carry secondary responsibility for the instruction. Specifically, the field instructor is expected to: (a) provide 1-2 hours of face-to-face supervision per week; (b) work with the student and faculty field liaison, develop a Learning Plan where s/he identifies learning tasks for the student which will provide an opportunity for the application and integration of the social work knowledge, values and skills; (c) attend, or complete online, orientation sessions and meetings designed for field instructors by field faculty; (d) write and submit electronically to the Director of Field Education required student midterm and final evaluations; and (e) advise the faculty field liaison of any special performance problems related to educational, physical, or psychological difficulties which may arise.

Section 8. Task Supervisors

A task supervisor is a professional in the field agency or community who has special expertise in an area included in the student’s Learning Plan and with agreement of the field instructor, student, and faculty field liaison can serve to supervise the student’s carrying out a specific learning task. The task supervisor functions in this specific role and is invited to participate in periodic supervisory sessions with the field instructor in order to demonstrate/convey his/her competencies in a specific learning area. The task supervisor does not supplant or replace the supervisory relationship with the field instructor.

Section 9. Field Advisory Committee

The Field Advisory Committee is composed of community representatives (field instructors), and field faculty. Faculty members are elected to this committee in accordance with the Department’s Rules of Governance. The Field Advisory Committee’s responsibility is to advise the Director of Field Education, field faculty and program on policies and procedures related to Field Education. The Field Advisory Committee may review student applications for Field Education at the request of the Director of Field Education, usually pertaining to students who face challenges in successfully completing their field experience, and recommends internship assignments to the Director of Field Education.
**Section 10. Field Internship Student**

Students are expected to: (a) practice within the values and ethics of the social work profession; (b) take responsibility for learning (designation of learning needs and goals, develop a learning contract, follow through on field assignments, and participation in the supervisory process with the field instructor and faculty field liaison); (c) respond constructively to evaluations of performance; (d) notify the agency in the event of unavoidable absences; (e) arrange to make-up for any excused absences; (f) attend and participate at field education seminars; (g) adhere to the policies of the agency; (h) complete the required clock hours in accordance with the university calendar and the agency requirements; (i) initiate the scheduling of supervisory conferences with the field instructor; (j) initiate the scheduling of site visit(s) by the faculty field liaison; (k) contact the faculty field liaison in the event of internship difficulties as needed; (l) assure completion of midterm and final evaluations and other evaluations in a timely manner; and (m) complete all required documents to discontinue the internship.

**CHAPTER 2: FIELD POLICY AND PROCEDURES**

*Subchapter A: Selection of Field Agencies and Field Instructors*

The selection of field agencies and field instructors is an important part of the BSSW Program's curriculum development. The Director of Field Education and/or field faculty maintain the responsibility for determining an agency's suitability for serving as an internship site and a field instructor's qualifications for providing Field Education. The criteria for selecting field agencies and field instructors are in accordance with Curriculum Standards of the Council on Social Work Education and the policies of the University of North Dakota BSSW Program.

**Section 1. Process for Selection of Field Agencies**

Potential field agencies are required to review and to complete a Clinical Affiliation Agreement with the University of North Dakota. The Affiliation Agreement requires prospective field agencies to endorse a set of criteria in relation to the agency and in relation to the educational nature of the internship. The field faculty are responsible to assess the agency's compatibility with program selection criteria and to recommend approval or disapproval to the Director of Field Education.

**Section 2. Criteria for Selection of Field Agencies**

1. The agency must provide human services, or be a host agency providing a social work service component.

2. The agency must provide an opportunity for bachelor’s level students to gain generalist social work practice experience. Students must be provided an opportunity to develop and demonstrate the required competencies and corresponding behaviors as outlined in
the student’s Learning Plan. Students should be allowed to assume responsibility for
the clients they are serving.

3. The agency must provide an opportunity for students to utilize the network of human
services which are available in the community.

4. The agency must provide an opportunity for students to gain social work practice
experience with persons from diverse backgrounds.

5. The agency must be willing to provide resources to students including supervision that
is one to one for a minimum of one to two hours per week and available for consultation
throughout the week, office space, telephone, support services and other resources
necessary for students to perform as professionals. The agency must be willing to
permit the field instructor to: (a) interview perspective social work interns to determine
compatibility between field agency, field instructor and student; (b) participate with the
student in developing a Learning Plan while in the field internship; and (c) collaborate
with faculty on evaluating learning strategies that will support student learning during
the field internship.

6. The agency must be willing to provide field instructors who have their BSSW/BSW or
MSW degree from a Council on Social Work Education accredited program, and are
licensed in accordance with applicable state law, with the time and other resources
necessary to supervise students and to attend training sponsored by the University of
North Dakota.

7. The administration of the agency must be supportive of students completing an
internship experience in the agency setting, recognizing that the internship experience
is an educational experience and not employment.

8. The agency must adhere to social work values and ethics.

9. The agency must be willing to follow the procedures outlined in the Field Instructor
Manual.

Section 3. Process for Selection of Field Instructors

The role of field instructor is fundamental to the socialization and training of social work
students. Each individual in a field agency who serves as an agency-based field instructor is
required to complete the Field Instructor Application form. Prospective field instructors who
meet the selection criteria are approved by the Director of Field Education to serve as field
instructors.

Section 4. Criteria for Selection of Field Instructors

1. The Field Education component of the BSSW Program requires that field instructors
for bachelor’s level students have a BSSW/BSW or MSW from a Council on Social
Work Education accredited program, be licensed in accordance with applicable state
2. Field instructors must be willing to provide the necessary time to supervise students and assure an educational focus to their learning. This means weekly scheduling of one-on-one session for a minimum of one to two hours per week; and being available to consult with students during the week.

3. Field instructors new to the University of North Dakota BSSW Field Education must participate in field orientation, either in person or online, designed by the University of North Dakota field faculty. Field instructors who have completed the required training are encouraged to attend other training session throughout the year.

4. Field instructors must be willing to assist students in developing Learning Plans and in completing evaluations of performance. Field instructors must feel comfortable collaborating with the University of North Dakota field faculty in designing learning strategies suited to student learning needs.

Subchapter B: Field Instructor Training

Field instructors, approved by the Director of Field Education, are provided with annual training opportunities. These yearly opportunities typically occur in the spring. Field instructors are also afforded opportunities to attend other training at no or reduced fees. All trainings are live-streamed and recorded for Field Instructors at a distance.

Section 1. Spring Training Sessions

Spring training sessions focus on issues specific to field instructors' work with students. These training sessions involve topics such as, orientation to University of North Dakota, BSSW Program, Field Education, supervision and creating Learning Plans. Available online for field instructors at a distance, generally these sessions are interactive and include departmental faculty.

Section 2. Other Training Opportunities

During the year, field instructors are afforded opportunities to attend other social work training and conferences at no or reduced fees. Field instructors are notified by mail or email of these workshops and of special fee reductions.

Section 3. Attendance at Orientation and Training Sessions

Field instructors who are new to the University of North Dakota, BSSW Program Field Education are expected to attend field orientation sessions, either in person or online, or participate in individual visits with the Director or Field Education and/or field faculty. In accordance with Field Education's efforts to maintain quality field experiences, field instructors are encouraged to attend ongoing training sessions offered by the program.
Subchapter C: Applying for Field Education

Section 1. Criteria for Admission to Field Education

Students are eligible for admission into Field Education in advance of entry into field, for the purposes of planning the agency match. To be eligible for admission to Field Education, a student must have:

- A plan to complete all required social work courses prior to entering field.
- A 2.75 or better overall GPA.
- A 2.75 GPA or better in all social work courses.
- Passed a criminal background check.
- Agreed to abide by the National Association of Social Workers, Social Work Code of Ethics.

Section 2. Process of Applying for Field Education

Students interested in a field internship are required to participate in pre-field orientations and to schedule an appointment with the Director of Field Education and/or field faculty to discuss career interests, field considerations, and learning needs. Following the interview, students complete their application for Field Education using the online system (see Appendix I. Field Education Application). All field applications must be approved and signed by the students’ faculty advisor indicating that s/he has met eligibility requirements for admission into Field Education. Field faculty will assist the Director of Field Education in evaluating the student’s readiness for Field Education. Any concerns will be addressed through the BSSW Program policy relative to standards for social work education.

Students who wish to do their placement in an agency where they are currently employed are required to complete additional forms with their application for Field Education. These forms are available in the online system under ‘Add New Form’. The field faculty will interview the student and review student applications for Field Education and recommend agency matches. Students are notified by email of their agency match. Following preliminary interviews, students and field instructors notify the Director of Field Education and/or field faculty of their mutual acceptability. In turn, the Director of Field Education and/or field faculty notifies students and field instructors of their internship agreement. Prior to beginning field, students complete an Internship Agreement in the online system and discuss learning opportunities with field instructors. Overall, the application process encourages students to assess their readiness for Field Education, to thoroughly examine their individual learning needs, to explore their
preferences of agency settings for the field internship, and to take initiative in defining learning
tasks during the field internship.

Careful steps are taken to assure a good match between the student and the recommended field
agency. Students may not reject an internship site prior to interviewing with an agency. If
unforeseen circumstances arise, the student may appeal this policy with the Director of Field
Education. If the student rejects the first internship site after the interview, the student must
submit a written rationale for rejecting the internship site and submit a written request for a
second option. If the student rejects the second option, the Field Education office is not
required to place the student in the same semester.

**Section 3. Criminal Background Check**

Due to the requirements of the social work profession, the state of North Dakota and many
agencies, Field Education applicants must submit to and satisfactorily complete a background
check. Background checks should be completed in the semester prior to the student beginning
the field. Passing the background check is required for admission into Field Education.

**Guidelines and Requirements:**

1. Students must use the vendor designated by Field Education, and must complete the
   background check through the approved University of North Dakota site.
   
   a. Background checks done outside of the University of North Dakota will be
      accepted if:

   i. Completed the previous 3 months prior to starting the field internship,

   **AND**

   ii. As part of applying for licensure with the state of North Dakota,

   **OR**

   iii. Using a process that involved submitting the student’s fingerprints as
       part of the background check.

2. Students are responsible for any background check fees.

3. Students have the right to review the background information for accuracy and
   completeness and to request that the vendor verify the background information is
   correct.

4. Before making final determination that would adversely affect the applicant or student,
   Field Education will inform them of their rights and how to contact the vendor to
   challenge the accuracy of the report.
5. Background check reports are confidential, may only be reviewed by university officials and affiliated agencies, and will be maintained in a separate file from the student’s academic record. Once completed, a copy of the report will automatically be sent to the student’s email address and to the Director of Field Education, who will review the results and notify the student of any issues of concern.

Subchapter D: Chronology of Steps in Applying for Field Education

Section 1. Before Internship

6 – 9 Months

- Director of Field Education and/or field faculty notify prospective BSSW students of the time-line for applying for Field Education by email.

- Students attend pre-field orientation where Field Education and the application process are explained.

- BSSW students complete the field application through the online system in accordance with the deadlines, which has been reviewed and signed by their faculty advisor. In addition to the Field Education Application, which includes an autobiographical statement, students must upload a resume, including three references, to their student detail page. Students must complete an additional form requesting consideration of placements in agencies where they are currently employed.

- The Director of Field Education initiates gate-keeping procedures with faculty.

1 – 3 Months

- Field faculty review applications for Field Education and recommends internship sites based on criteria. The Field Advisory Committee may be asked to review applications to Field Education and recommend acceptance or rejection.

- Director of Field Education and/or field faculty notify students of the recommended field agency and field instructor. The Director of Field Education notifies student of actions on additional forms.

- Director of Field Education and/or field faculty makes available students’ application for Field Education and resume to prospective field agency and field instructor.

- Once approved by field instructors, the Director of Field Education and/or field faculty will inform the student, who in turn initiates an interview with the prospective field agency and field instructor.
• Students and field instructor notify the Director of Field Education and/or field faculty of mutual acceptability of the field internship.

• Students initiate the completion of the Internship Agreement with the agency (see *Appendix II. Internship Agreement*) through the online system.

• Students complete criminal background check through Field Education’s approved vendor, unless other arrangements have been made with the Director of Field Education.

• Students attend pre-field orientation during the semester prior to their field internship.

**Section 2. Beginning of Internship**

• Students begin field in accordance with the field calendar, unless alternative arrangements have been made and approved.

• Students may begin field one week early or one week later than the official start date with prior approval of the Director of Field Education and/or field faculty.

**Section 3. During Internship**

• Students initiate completion of the Learning Plan in the online system with field instructor in accordance with published deadlines.

• Students attend field education seminars over the course of the semester.

• Students submit assignments to the field education seminar instructor during the internship.

• Students initiate completion of the midterm evaluations in the online system with field instructor in accordance with published deadlines.

• Students initiate completion of the final evaluations in the online system with field instructor in accordance with published deadlines.

**Section 4. End of Internship**

• Students initiate completion of the Request to Discontinue Field Internship form in the online system. Students will also complete evaluations of field agency, faculty field liaison, and Director of Field Education and/or field faculty in the online system.

**Subchapter E: Block Internship or Part-Time Internship**

**Section 1. Block Internship**
BSSW students are expected to participate in a block internship. A block internship starts at the beginning of the academic term and finishes at the end of the academic term. The student must complete a minimum of 450 hours in the internship. Generally, a block internship is considered full-time or at minimum 32 hours per week for 16 weeks (or a minimum of 37.5 hours per week for 12 weeks during the summer). During block internship, students participate in field education seminars at regularly scheduled intervals. Students wishing to begin or end the internship at times that do not correspond to the beginning and ending of academic terms must submit a proposal to the Director of Field Education and/or field faculty prior to beginning their field internship. No field internship will begin before one week prior to the beginning of the academic term and no hours will be granted for time spent prior to the beginning of approved Field Education.

Section 2. Part-Time Internship

BSSW student may request a part-time field internship over two semesters. This two semester internship requires the student to be at the agency site 12-14 hours per week. Eight of those hours are expected to occur during normal business hours in order to develop an entry level understanding of agency roles and functions. A part-time internship starts at the beginning of an academic term and finishes at the end of the second academic term. Students wishing to request a part-time internship must let the Director of Field Education know.

Subchapter F: Selecting Internship Sites

BSSW students are encouraged to be actively involved in the assessment of their learning needs. A major part of this involvement is the student's self-assessment of the type of internship experience desired and the nature of supervision desired while in the internship. To facilitate this assessment, students are encouraged to express preferences for types of agencies and desired experiences and to express limitations with regard to geographic internship sites during an interview with the Director of Field Education and/or field faculty and on their Field Education Application. Although the field faculty, and under certain circumstances the Field Advisory Committee, are responsible for matching students with internship sites, student preferences are strongly considered.

Section 1. Internship Sites Listed in the Directory of Approved Field Agencies

Field Education maintains current Affiliation Agreements with a large number of agencies in the region. Students have access to information about these agencies in the online system. Information is available on the agency's primary area of practice, methods employed, populations served, locations, and supervisor and degree.

Section 2. Requests for Internship Sites Not Listed in Directory of Approved Field Agencies

Occasionally students will desire a field internship experience in an agency that does not currently have a signed Affiliation Agreement with the program. In this case students need to discuss with the Director of Field Education and/or field faculty their situations and why they wish to have a particular type of internship experience. Students who are interested in learning
experiences that are unique need to express their interests to the Director of Field Education and/or field faculty early in the internship process because of the length of time needed to develop approved agency sites and approved field instructors. The decision to pursue new options will rest on a number of factors including: (a) the unique opportunities of the internship site they are requesting; (b) an assessment of educational benefits to the student; (c) additional fees necessary to plan and supervise such an experience; (d) the availability of supervision; and (e) if it is within the catchment area of North Dakota, South Dakota, Minnesota and Southern Manitoba, Canada. Before a student will be placed in any agency, an Affiliation Agreement and an approved application from a field instructor needs to be on file with the Director of Field Education.

Section 3. Requests for Internship Sites in Places of Employment

As a general policy students are not assigned a field internship at their place of employment. Students may, under extremely rare circumstances, use their place of employment for their internship site. In situations where a student is interested in an internship in their place of employment, they need to complete and submit the Request for Field Internship at Agency Employed form in the online system under ‘Add New Form’, (see Appendix IV. Request for Field Internship at Agency Employed) along with their Field Education Application (see Table F-1. Criteria for Student Proposals to be considered for an Internship in a Place of Employment). The Field Director will act upon the proposal, along with other application materials. The Field Director may determine that: (1) the student's proposal does not adequately address the necessary criteria for an internship in their place of employment; or (2) the student's proposal is conditionally approved pending further clarification, approval of agency and field instructor, and completion of a Learning Plan; or (3) the student's proposal is approved pending approval of field agency and field instructor.

<tr>
<td>1. The field instructor must be different from the student’s work supervisor and cannot be a current or past employee of the student or an immediate work colleague. Potential boundary concerns between the student and the prospective supervisor must be identified and adequately addressed.</td>
</tr>
<tr>
<td>2. The population of clients served in the internship must be substantially different from the population of clients served through work.</td>
</tr>
<tr>
<td>3. The nature of the tasks and assignments must be distinctly different from the tasks and assignments assigned through work.</td>
</tr>
<tr>
<td>4. The internship time must be protected through regularly scheduled hours and procedures for handling work related requests.</td>
</tr>
</tbody>
</table>
Completed applications for Field Education are submitted to the Director of Field Education by the deadline dates published on the student’s pre-field calendar. Pre-field calendars are distributed to students during the first pre-field orientation as well as posted on the department’s Field Education bulletin board.

Section 1. Contents of Application

- Application for Field Education (see Appendix I. Field Education Application) which includes a personal statement in Section 2.

- Personal Statement Guidelines:
  a. should be one to two pages in length.
  b. discuss why the student decided to pursue social work as a career.
  c. discuss student’s long-term goals, including plans for after graduation.
  d. discuss what the student hopes to give and get from their internship experience.

- Resume, which includes three professional references should be uploaded to the student detail page in the online system.

- If Appropriate:
  a. request for Field Internship at Agency Employed form to do an internship in agency of employment.

Incomplete or late applications may result in delays in being considered for placement during this cycle. Application materials are available to field faculty and will be sent to prospective field instructors.

Subchapter H: Criteria for Assessment of Student Learning Needs

- The breadth, depth and relevance of a student's prior work experiences as identified by student and interpreted by members of the field faculty.

- Characteristics of the student's preferred learning environment as identified by student and concurred with by the Director of Field Education Director and faculty.

- The student's expressed interest in a particular style of supervision.

- Personal factors as identified by the student: (a) prior personal and/or emotional experiences; (b) student perceived physical, mental or emotional limitations; (c)
transportation concerns; (d) family concerns; and (e) economic concerns.

- The student's work habits in the classroom setting as identified by faculty and the student.
- The student's verbal and written communication skills as identified by faculty and the student.
- The nature and extent of a student's assertiveness and interpersonal skills as identified by faculty and the student.
- A student's abstract/concrete thinking skills as identified by faculty.
- The extent of independence with which a student's tends to function as identified by the faculty and the student.
- Student's expressed career goals.
- Student's preferences for internship site.

**Subchapter I: Agency Factors Considered in Matching Students with Internship Sites**

- Types of services and populations of individuals served through the agency.
- Years of experience, training of field instructors.
- Participation of field instructor in program sponsored training.
- Frequency and nature of supervision provided.
- Expectations of supervisor for student independence.
- Breadth and depth of field internship with regard to a full range of generalist practice experiences.
- Prior student and faculty field liaison evaluations of agency and field instructor.
- Field instructor's particular interests.
- Current stability of the agency with regards to employees, administration, and programming.

**Subchapter J: Student Pre-Internship Interviews with Potential Agency**
The purpose of the pre-internship interview is to establish the compatibility of the student, the student interests, the field instructor, and the field agency. Student and field instructor mutually explore interests, course objectives, learning opportunities, personal and professional interests, and limitations in order to assess the mutuality of their needs and interests.

Following the interview, the student takes the initiative to contact the Director of Field Education and/or field faculty to report on the acceptability of the site. The field instructor also contacts the Director of Field Education and/or field faculty to report on the acceptability of the student. Upon discovery of mutual acceptability, the Director of Field Education and/or field faculty notify the student and the field instructor of the mutual acceptance. The student is assigned to the internship site.

In a situation where the mutuality of the student and the field instructor/field agency is not obtained, the Director of Field Education and/or field faculty will meet with the student to discuss the reasons for the decision and to explore an alternate field instructor/field agency.

Careful steps are taken to assure a good match between the student and the recommended field agency. It is not acceptable for a student to reject an internship prior to interviewing with an agency. In the event that a student interviews with the agency and then finds the agency match to be problematic, the student must make a written request to the Director of Field Education to be considered for an alternative internship site. The Director of Field Education and/or field faculty will then identify a revised recommendation. A student who rejects a second agency match may not be admitted to Field Education in the term requested.

**Subchapter K: Policy on Sharing Personal Information**

The student is expected to share any information that is relevant to a field internship site. Information is relevant to a field internship site if it relates to practice, relates to the knowledge, values, and skills of the profession, impacts the ability to succeed in field internship, or impacts the ability to protect clients. Examples of relevant student information to be shared include the following examples: (a) if the student desires to be placed at the Community Violence Intervention Center and the student or a member of the student’s family has been a victim of physical or sexual abuse, the student should probably share this information; (b) if the student or a member of the student’s family received services from child welfare and the student desires to do their internship in an agency providing child welfare services, the student should probably share this information; (c) if the student has an illness or disability that will or may affect the performance of the student’s field internship responsibilities, the student should probably share this information; and (d) if the student has received psychiatric treatment, substance abuse treatment, has been convicted of a crime, has a chronic illness, has had performance problems in class, previous field internship, or previous employment, the student should probably share this information.

The sharing of information is meant for the sole purpose of serving the student best with regard to their educational, experiential, supervisory, ethical, and professional needs. Information shared in the application as well as all-relevant personal student information may be shared with faculty field liaisons and/or field instructors. Information will be shared if it will enable an appropriate field internship, provide informed choices by field instructors, protect clients, protect students, and facilitate the learning process. Students who believe personal information may be or has been
misused can present their concerns to the Director of Field Education and/or field faculty for assessment and recommendations. If the matter cannot be resolved at this level, the student may appeal the recommendations of the Director of Field Education and/or field faculty through the appropriate channels starting with the departmental chairperson and moving up to the next step if satisfactory resolution is not obtained.

**Subchapter L: Student Notification of Recommended Internship Site**

The Director of Field Education and/or field faculty contact the field instructor and field agency to discuss the internship of the student in the agency. The student's Field Education Application, and resume are forwarded to the field instructor. The student gives permission for the sharing of information with potential field instructors on the Field Education Application.

The Director of Field Education and/or field faculty will notify the student of the recommended internship site by email. Students are provided with the agency name, field instructor name, address and telephone number. The student is asked to make contact with the potential field instructor in order to set up a pre-internship interview. Upon completion of the interview, the student and field instructor will notify the Director of Field Education and/or field faculty of their decision. If both parties are agreeable, then the Director of Field Education and/or field faculty will notify the student of final approval of internship site.

**Subchapter M: Completion of Internship Agreement**

The Internship Agreement provides the student and the field instructor the opportunity to finalize starting and ending dates of the internship, average hours to be in the internship, and handling of holidays and vacations (see Appendix II. Internship Agreement). The Internship Agreement contributes to increased understanding of administrative issues during the internship. A finalized Internship Agreement requires the signatures of the student and the field instructor in the online system.

Ideally, the Internship Agreement should be completed shortly after the agency match is confirmed as a result of the pre-internship interview, and the Internship Agreement must be completed no later than the first day in placement.

**Subchapter N: Completion of Learning Plan and Field Evaluation**

**Section 1. Purpose of a Learning Plan and Field Evaluation**

The use of a Learning Plan and Field Evaluation in the field internship is built around a model of learning and accountability. The Learning Plan is a tool for students to use to identify specific behaviors that demonstrate the core social work competencies, and then evaluate outcomes.

An individualized student Learning Plan and Field Evaluation provides a guideline for an intentional Field Education experience. It enables the field experience and associated learning to be even more of a joint effort. The Learning Plan: (a) defines tasks that will demonstrate behaviors a student will carry-out in the agency; (b) meets course objectives (see Table N-I.
Objectives for BSSW Field Education; (c) provides the student with the structure to make more productive use of internship time; and (d) evaluates the student’s progress.

In a collaborative field experience, the field instructor and the student need to have a shared idea of where they are going to be headed (course objectives for Field Education as defined by the BSSW Program in accordance with the Council on Social Work Education), how they are going to get there (behaviors as spelled out in the Learning Plan) and a means to evaluate the student’s growth and development. The Learning Plan and Field Evaluation provides an overarching framework that directs the actions of the student and field instructor. Together, over the internship experience, the student and the field instructor meet in regularly scheduled sessions to evaluate the student’s progress or problems in achieving competency of the outlined behaviors. As with any rational method of projecting future activities, the Learning Plan and associated tasks are subject to revision.

### Table N-1. Objectives for BSSW Field Education

Each competency describes the knowledge, values, skills, and cognitive and affective processes that comprise the competency at the generalist level of practice, followed by a set of behaviors that represent observable components of the competencies. The preceding statements represent the underlying content and processes that inform the behaviors.

1. **Demonstrate Ethical and Professional Behavior.**
   Social workers understand the value base of the profession and its ethical standards, as well as relevant laws and regulations that may impact practice at the micro, mezzo, and macro levels. Social workers understand frameworks of ethical decision-making and how to apply principles of critical thinking to those frameworks in practice, research, and policy arenas. Social workers recognize personal values and the distinction between personal and professional values. They also understand how their personal experiences and affective reactions influence their professional judgment and behavior. Social workers understand the profession’s history, its mission, and the roles and responsibilities of the profession. Social Workers also understand the role of other professions when engaged in inter-professional teams. Social workers recognize the importance of life-long learning and are committed to continually updating their skills to ensure they are relevant and effective. Social workers also understand emerging forms of technology and the ethical use of technology in social work practice. Social workers:
   - Make ethical decisions by applying the standards of the NASW Code of ethics, relevant laws and regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics as appropriate to context;
   - Use reflection and self-regulation to manage personal values and maintain professionalism in practice situations;
   - Demonstrate professional demeanor in behavior; appearance; and oral, written, and electronic communication;
   - Use technology ethically and appropriately to facilitate practice outcomes;
   - Use supervision and consultation to guide professional judgement and behavior.

2. **Engage Diversity and Difference in Practice.**
   Social workers understand how diversity and difference characterize and shape the human
experience and are critical to the formation of identity. The dimensions of diversity are understood as the intersectionality of multiple factors including but not limited to age, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, immigration status, marital status, political ideology, race, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Social workers understand that, as a consequence of difference, a person’s life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim. Social workers also understand the forms and mechanisms of oppression and discrimination and recognize the extent to which a culture’s structures and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Social workers:

- Apply and communicate understanding of the importance of diversity and difference in shaping life experiences in practice at the micro, mezzo, and macro levels;
- Present themselves as learners and engage clients and constituencies as experts of their own experience;
- Apply self-awareness and self-regulation to manage the influence of personal biases and values in working with diverse clients and constituencies.

3. **Advance human rights and social, economic, and environmental justice.**

Social workers understand that every person regardless of position in society has fundamental human rights such as freedom, safety, privacy, an adequate standard of living, health care, and education. Social workers understand the global interconnections of oppression and human rights violations, and are knowledgeable about theories of human need and social justice and strategies to promote social and economic justice and human rights. Social workers understand strategies designed to eliminate oppressive structural barriers to ensure that social goods, rights, and responsibilities are distributed equitably and that civil, political, environmental, economic, social, and cultural human rights are protected. Social workers:

- Apply their understanding of social, economic, and environmental justice to advocate for human rights at the individual and systems level;
- Engage in practices that advance social, economic, and environmental justice.

4. **Engage in practice-informed research and research informed practice.**

Social workers understand quantitative and qualitative research methods and their respective roles in advancing a science of social work and in evaluating their practice. Social workers know the principles of logic, scientific inquiry, and culturally informed and ethical approaches to building knowledge. Social workers understand that evidence that informs practice derives from multi-disciplinary sources and multiple ways of knowing. They also understand the processes for translating research findings into effective practice. Social workers:

- Use practice experience and theory to inform scientific inquiry and research;
- Apply critical thinking to engage in analysis of quantitative and qualitative research methods and research findings;
- Use and translate research evidence to inform and improve practice, policy, and service delivery.
5. **Engage in Policy Practice.**
Social workers understand that human rights and social justice, as well as social welfare and services, are mediated by policy and its implementation at the federal, state, and local levels. Social workers understand the history and current structures of social policies and services, the role of policy in service delivery, and the role of practice in policy development. Social workers understand their role in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and they actively engage in policy practice to effect change within those settings. Social workers recognize and understand the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They are also knowledgeable about policy formulation, analysis, implementation, and evaluation. Social workers:
- Identify social policy at the local, state, and federal level that impacts the well-being, service delivery, and access to social services;
- Assess how social welfare and economic policies impact the delivery of and access to social services;
- Apply critical thinking to analyze, formulate, and advocate for policies that advance human rights and social, economic, and environmental justice.

6. **Engage with individuals, families, groups, organizations, and communities.**
Social workers understand that engagement is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers value the importance of human relationships. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to facilitate engagement with clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand strategies to engage diverse clients and constituencies to advance practice effectiveness. Social workers understand how their personal experiences and affective reactions may impact their ability to effectively engage with diverse clients and constituencies. Social workers value principles of relationship-building and inter-professional collaboration to facilitate engagement with clients, constituencies, and other professionals as appropriate. Social workers:
- Apply knowledge of human behavior and the social environment, person-in-person environment, and other multidisciplinary theoretical frameworks to engage with clients and constituencies;
- Use empathy, reflection, and interpersonal skills to effectively engage diverse clients and constituencies.

7. **Assess individuals, families, groups, organizations, and communities.**
Social workers understand that assessment is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in the assessment of diverse clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand methods of assessment with diverse clients and constituencies to advance practice effectiveness. Social workers recognize the implications of the larger practice context in the assessment
process and value the importance of inter-professional collaboration in this process. Social workers understand how their personal experiences and affective reactions may affect their assessment and decision-making. Social workers:
- Collect and organize data, and apply critical thinking to interpret information from clients and constituencies;
- Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the analysis of assessment data from clients and constituencies;
- Develop mutually agreed-on intervention goals and objectives based on the critical assessment of strengths, needs, and challenges within clients and constituencies;
- Select appropriate intervention strategies based on the assessment, research knowledge, and values and preferences of clients and constituencies.

8. **Intervene with individuals, families, groups, organizations, and communities.**
Social workers understand that intervention is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations, and communities. Social workers are knowledgeable about evidence-informed interventions to achieve the goals of clients and constituencies, including individuals, families, groups, organizations, and communities. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge to effectively intervene with clients and constituencies. Social workers understand methods of identifying, analyzing and implementing evidence-informed interventions to achieve client and constituency goals. Social workers value the importance of inter-professional teamwork and communication in interventions, recognizing that beneficial outcomes may require interdisciplinary, inter-professional, and inter-organizational collaboration. Social workers:
- Critically choose and implement interventions to achieve practice goals and enhance capacities of clients and constituencies;
- Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in interventions with clients and constituencies;
- Use inter-professional collaboration as appropriate to achieve beneficial practice outcomes;
- Negotiate, mediate, and advocate with and on behalf of diverse clients and constituencies;
- Facilitate effective transitions and endings that advance mutually agreed-on goals.

9. **Evaluate practice with individuals, families, groups, organizations, and communities.**
Social workers understand that evaluation is an ongoing component of the dynamic and interactive process of social work practice with, and on behalf of, diverse individuals, families, groups, organizations and communities. Social workers recognize the importance of evaluating processes and outcomes to advance practice, policy, and service delivery effectiveness. Social workers understand theories of human behavior and the social environment, and critically evaluate and apply this knowledge in evaluating outcomes. Social workers understand qualitative and quantitative methods for evaluating outcomes and practice effectiveness. Social workers:
• Select and use appropriate methods for evaluation of outcomes;
• Apply knowledge of human behavior and the social environment, person-in-environment, and other multidisciplinary theoretical frameworks in the evaluation of outcomes;
• Critically analyze, monitor, and evaluate intervention program processes and outcomes;
• Apply evaluation findings to improve practice effectiveness at the micro, mezzo, and macro levels.

Section 2. Content of a Learning Plan and Field Evaluation

The Learning Plan begins with the recognition that the field internship is an educational course. As an educational course, it is designed for students to achieve certain objectives (see Appendix V. Learning Plan & Field Evaluation). The objectives for the field internship are defined in the beginning of this manual and are repeated in the previous table. Field objectives involve a set of expectations about the types of knowledge students will demonstrate, the behaviors they will exhibit, and the nature of values they will reveal. These objectives are expected to form the foundation of the field experiences of all social work students at the University of North Dakota.

Because each student is unique in terms of learning styles, interests and needs, each agency provides varying opportunities for student learning, and Field Education is part art and part science, the specific tasks associated with Learning Plans need to be tailored by the student and the field instructor. Through dialogue they creatively respond to the student’s needs and the agency opportunities for learning. The synergy of the student and the field instructor becomes a shared reality when they consider how the student in this agency with this supervisor can demonstrate key behaviors through a combination of activity, tasks, and discussion. It is expected that the Learning Plan will address at least one opportunity for the student in each of the core competencies listed above in Table N-1.

Section 3. Guidelines for Behaviors Associated with Learning Plans and Field Evaluations

In completing the Learning Plan a student from the University of North Dakota is expected to show competence in working with individuals, families, groups, communities and organizations. In addition, students are expected to demonstrate an ability to interpret policy and research and to apply such knowledge to their work with client systems of all sizes. Additionally, students are expected to: (a) demonstrate knowledge of the behaviors that demonstrate the core competencies; (b) demonstrate an ability to use this knowledge to guide interventions with clients systems; (c) develop and demonstrate an understanding of, a sensitivity to, and skill in working with diverse client systems representing vulnerable populations; (d) demonstrate a critical thinking perspective in applying theory to all phases of the problem-solving process; (e) develop and demonstrate an increasing awareness of how to use oneself with client systems at all levels; (f) demonstrate the ability to communicate clearly in written and verbal forms; and (g) demonstrate an ability to identify and to use ethical
reasoning in ethical dilemmas present in social work practice situations. For each of these competency areas, a student is expected to identify practice behaviors that will demonstrate a beginning mastery of the designated knowledge, skills, and values associated with the core competency. The field instructor, in collaboration with the faculty field liaison, evaluates the implementation of these in the field internship.

Section 4. Negotiating the Learning Plan and Field Evaluation

The student is expected to initiate contact with the field instructor to begin preparing the Learning Plan and Field Evaluation. The student is responsible for completing a Learning Plan during the beginning part of the field experience. In either situation, the following process is suggested as one way to develop a meaningful plan (see Table N-2. Negotiating the Learning Plan).

Table N-2. Negotiating the Learning Plan

1. In a conference with the field instructor, the student discusses what they want to learn during the internship and what the field instructor hopes the student will gain. This conference also includes further clarification of what the field instructor and the field agency have to offer. The student brings a copy of the Learning Plan and Field Evaluation form to clarify expectations.

2. The student writes a draft of his/her Learning Plan.

3. At a second supervisory conference, the student brings a draft of the Learning Plan for further discussion, clarification, additions and revisions.

4. After the second supervisory conference, the student should be ready to complete the written plan in preparation for it to be signed off on during a three-way conference between the student, the field instructor and the faculty field liaison. The student, field instructor and liaison will sign off on the Learning Plan by the date published in the field calendar.

5. It is the student’s responsibility to take the initiative in completing the plan and setting up the meetings with all other parties involved.

Subchapter O: Policy on Holidays, Vacations, and Breaks

Students may be excused from field practice on holidays, vacations and breaks, contingent on approval from their field instructor. The BSSW Program Field Education understands that the continuity of service to clients sometimes requires that students carry out all or part of their assigned tasks during these times and/or make arrangements with their field instructors for any necessary coverage required. It is important to discuss expectations about field hours early in the internship, especially if there is the possibility that the student’s field responsibilities will require the student’s participation at the field agency during Christmas break, Spring break, and other university holidays not shared by the agency.
Subchapter P: Policy on Time in the Internship Setting

Students are expected to be in the agency setting on a full-time basis (32 to 40 hours per week) for a block internship. Students will spend at least 450 hours in a field internship. Students should expect to be in the field internship from the first day of the academic term to the last day of the academic term depending upon agency requirements, completion of course objectives, and required minimum hours. Students may request to start and/or end their field internship no more than one week prior to or after the end of the published field term dates. The Director of Field Education will review and approve these requests on an individual basis, considering willingness of the agency to accommodate the requested change. Seminar days are planned well in advance and students should plan on taking time away from their internship to attend these classes.

Section 1. What counts as Field Internship Time

- Time spent in the field agency that is specifically related to the tasks identified in the student's Learning Plan and Field Evaluation. This includes the time necessary to complete an orientation to the agency (maximum of 40 hours).

- Field Education seminar assignments may be completed during the course of the internship time provided the seminar assignments are a part of the Learning Plan developed for the student in the agency and approved by the field instructor.

- Travel time on behalf of the agency.

- Time spent in attendance at external workshops and seminars that are specifically related to the student's Learning Plan and Field Evaluation and endorsed by the field instructor.

- Only time approved by the field instructor and faculty field liaison.

Section 2. What does not count as Field Internship Time

- The BSSW Program does not grant social work course credit for life experience or previous work experience.

- Time in the library researching materials for the student’s seminar assignments that are not directly related to the student’s Learning Plan and approved by the student’s field instructor, typing seminar papers, working on independent research does not count as internship time unless directly related to Learning Plan and approved by field instructor.

- Travel time to and from field internship and travel time to and from field education seminars do not count towards the student’s internship hours.

- Time spent in the field education seminars, which is a separate course from Field Education, does not count towards field internship hours.
- Time spent away from the field agency due to illness, holidays, vacations, and non-work related situations.

- Time spent attending pre-field orientations.

Students are to complete weekly time sheets in the online system that detail the number of hours spent in the internship setting (see Appendix VI. Field Education Time Sheet). These hours are recorded based on direct, indirect, administrative, development, travel, and other time. The weekly time sheets are signed by the field instructor and the student in the online system. It is advisable for students to keep personal backup copies of the time sheets in case one is lost.

Students can expect to be contacted by the Director of Field Education or faculty field liaison if they fail to submit weekly time sheets or if the weekly time sheets indicate the student is not present in the agency for the times agreed upon in the Internship Agreement.

**Subchapter Q: Policy on Personal Use of Vehicle**

Students may be required to have a valid driver's license, a vehicle or the ability to use a personal vehicle for transportation during the field internship. Some students may be required to accept field internships that are out of town. In these situations students will be responsible for making transportation arrangements between the internship sites and the campus to attend field education seminar meetings as required during the semester. In other situations, the nature of the internship experience may require the student to travel across counties or cities to meet with clients and other professionals. In some situations, students may be asked to transport clients in the student's personal vehicle.

Students should call their automotive insurance carrier and request verification in writing that they have or do not have liability coverage to transport clients in their vehicles during the internship experience. If students do not have coverage and choose not to purchase such coverage, they need to discuss this issue with their field instructor during the pre-internship interview and during the completion of the Internship Agreement.

Early in the application process, students should inform the Director of Field Education and/or field faculty of any limitations they have with regard to transportation.

**Subchapter R: Policy on Sexual Harassment**

Consistent with federal statutes prohibiting sex discrimination in educational programs and in employment, the University of North Dakota prohibits sexual harassment of students, faculty, and staff. The primary goals of this policy are to prevent sexual harassment and to stop the objectionable behavior whenever it occurs. The university will take preventative and corrective action to maintain a working and learning environment free from sexual harassment.

**Section 1. Definition of Sexual Harassment**
For the purpose of implementation of this policy, sexual harassment is defined as: “...any attempt to coerce a person into a sexual relationship or to subject a person to unwanted sexual attention or to punish a refusal to comply with sexual demands. Sexual harassment may consist of requests or demands for sexual favors, unwelcome physical advances, or conduct (verbal or physical) of a sexual nature that is intimidating, demeaning, hostile, or offensive or that creates an atmosphere that is perceived to be intimidating, demeaning, hostile or offensive.” Often sexual harassment involves an authority relationship in which the person who is subjected to the harassment is vulnerable with respect to enrollment or academic status. Sexual harassment may also occur when the kinds of behaviors previously mentioned interfere with the individual's work experience or the student's educational experience or where the employee or student is denied full and equal participation and opportunities. Some behavior such as a demand for sexual favors in return for a promotion or a better grade are clearly prohibited while others, such as touching or joking, constitute sexual harassment if the behavior persists despite an indication by the recipient that it is unwelcome. If this behavior occurs in an academic setting or internship setting and the professor or supervisor is aware of the harassment, he/she has the responsibility to ensure that such harassment ceases (see University of North Dakota Code of Student Life, http://und.edu/code-of-student-life/).

Section 2. Policy on Sexual Harassment in Field Education

In the event that a student feels that he or she has been sexually harassed* by staff in a field agency setting, the student should immediately notify the field instructor in that agency setting. Before any formal action is taken by the field instructor or the student, the faculty field liaison should be notified of the concern and subsequently the Director of Field Education. If sexual harassment involves the student's field instructor, the student should immediately notify the faculty field liaison of the difficulty and subsequently the Director of Field Education. If the agency has a designated individual or office to deal with sexual harassment that person or office should be notified by the student in the event a formal charge is being made. The student should examine appropriate agency policy before filing a grievance and provide appropriate parties mentioned above with a written statement regarding the nature of the violation. This statement should be as specific as possible including date(s), time(s), and individual(s) involved. If the student made any attempt to confront this situation, this should also be included in the report.

*An act constitutes sexual harassment...

1. If submission to the conduct is either an explicit or implicit term or condition of beginning or continuing the field internship; or

2. If submission to or rejection of the conduct is used as a basis for evaluating the intern's performance; or

3. If the conduct has a purpose of affecting or substantially interfering with the person's performance or creating an intimidating, hostile or offensive work related environment.

Subchapter S: Professional Liability Insurance
The University of North Dakota provides professional liability insurance coverage for all students enrolled in Field Education as well as for the University of North Dakota faculty. Field instructors are not covered by the University of North Dakota and must rely on their own agency insurance or personal liability insurance. Students should be aware that professional liability insurance is available to them through the National Association of Social Workers at very reasonable rates. Students may wish to consider purchasing this coverage even though they will be covered as participants in Field Education.

Subchapter T: Policy on Non-Discrimination

It is the policy of the University of North Dakota that there will be no discrimination on the basis of race, color, sex, religion, sexual orientation, gender identity, genetic information, age, national origin, the presence of any mental or physical disability, political belief or affiliation, status with respect to marriage or public assistance, or status as a veteran. This policy is particularly applicable in the admission of students in all colleges and in their academic pursuits (see University of North Dakota Code of Student Life, http://und.edu/code-of-student-life/).

Subchapter U: Procedures on Premature Termination from Field Education

Interruption or Premature Termination of Student Internships

At times, a student enrolled in Field Education may not be able to complete the internship experience for a number of reasons. A student internship may have to be interrupted or terminated for the following reasons: (a) The field instructor or the agency refuses to continue offering supervision to the student (see Table U-1); (b) the student decides to not continue with the field internship (see Table U-2); or (c) the faculty field liaison determines that the student should no longer continue in the field internship (see Table U-3). The purpose of the guidelines is to set forth the procedures to be followed in the event the placement must be interrupted or terminated.

<table>
<thead>
<tr>
<th>Table U-1. Procedures for Handling Premature Termination of the Internship when Field Instructor or Agency Desires to Terminate Internship</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The field instructor must first give notification to and discuss the concerns with the faculty field liaison before notifying student. It is expected that a field instructor will contact the faculty field liaison early on in the internship experience if s/he believes there may be problems with student performance. It is expected that ongoing field supervision involve interventions with students. Attempts will be made by the faculty field liaison to mediate any concerns between the student and the field instructor.</td>
</tr>
<tr>
<td>• The faculty field liaison and field instructor will meet with the student to directly discuss concerns and seek to work with the student to resolve the difficulties and explain reasons why termination is being considered.</td>
</tr>
</tbody>
</table>
• The faculty field liaison will apprise the Director of Field Education of the concerns in order to identify potential patterns and issues related to student. Documentation of dates and content of meetings with student will be placed in the student’s file.

• If the resolution of the issue is the termination of Field Education for the student, then the field instructor and the student will develop a plan to determine how termination will be handled with clients whom the student has been serving.

• If the field instructor chooses to terminate supervision without discussing the issues with the student or faculty field liaison, the field instructor must present detailed reasons for termination in writing to the student and the faculty field liaison. In this situation, the faculty field liaison will involve the Director of Field Education and the agency administrator in a discussion to evaluate the concerns about the internship site.

• In the event that the reason for termination is unrelated to the student’s performance in the internship, every reasonable attempt will be made by the Director of Field Education and/or field faculty to place the student in another agency during the course of that same semester. The agency should make every effort to adhere to the Clinical Affiliation Agreement guidelines regarding termination of student from internships.

Table U-2. Procedures for Handling Premature Termination of the Internship when Student Terminates Internship

• The student should provide written notification to the field instructor and faculty field liaison containing detailed reasons for termination.

• The student and the field instructor will develop a plan to arrange for the student to terminate client services.

• The student will meet with the Director of Field Education to discuss a future course of action.

• Field Education is not obligated to seek an alternative internship site during the same semester if the internship is terminated by the student.

Table U-3. Procedures for Handling Premature Termination of the Internship when Faculty Field Liaison Terminates Internship

• The faculty field liaison will meet with the student to directly discuss concerns and seek to work to resolve difficulties.

• If this does not resolve the issue, the field instructor, faculty field liaison, and Director of Field Education will conduct a review of the student. Input will be secured from the student in this information gathering process. The Director of Field
Education will determine the nature of the concern and gather sufficient information to develop a plan to address that concern, if one is needed. No further action may be required, or the student may be asked, in writing, to modify his/her behavior and/or seek appropriate help. This process is designed to assist students in dealing with identified concerns that have an impact on their performance. The Director of Field Education will assess the nature of these concerns and maintain documentation and, in consultation with the Department Chair, if needed, determine if a more comprehensive review is required or recommended.

- A comprehensive review is indicated when concerns have not been resolved in prior reviews or when issues related to a student not meeting the criteria for academic performance (often involving professional or ethical behaviors). The level of review may also occur when problematic patterns are identified with students or when the issues are serious enough to require formal consultation with other faculty and the student is being considered for withdrawal or discontinue in the program. In most instances, this level of review is sufficient to deal with student performance and is the last decision making step in the review process.

- At the comprehensive level of review, the Director of Field Education, the student’s advisor and the BSSW Program Director will convene a meeting with the appropriate faculty and the student, to gather information, determine the nature of the problem (if one is confirmed to exist), and identify alternatives for its remediation. Appropriate faculty to be involved in this level of review will include, but are not limited to, those who have direct knowledge of, and experience with the student. The student will be notified in writing of the concerns and meeting date, with sufficient time to prepare for and attend the meeting.

- The course of action the program takes may include, but is not limited to, the following:
  
  a) The student received a failing grade for the semester.

  b) The student is asked to drop all field and seminar courses, and wait to re-enroll in the Field Education until the student’s personal and professional issues have been resolved.

  c) The student may be placed in another agency setting the same semester. The faculty field liaison will also be responsible for the final grade the student will receive.

  d) The student will be asked to withdraw from the BSSW Program.

- In this comprehensive level of review, there must be clear, concise documentation of the problem areas as well as verification that these concerns have been discussed with the student and attempted to be ameliorated, when appropriate. Students must be notified of the decision in writing within ten calendar days of the review. It is the
responsibility of the Director of Field Education or faculty advisor to communicate the decision to the student.

- The faculty field liaison must give notification to the agency.

- The field instructor and student will develop a plan to determine how the student will terminate services with clients that the student has been serving, unless there is a need for immediate termination (see *BSSW Student Handbook: Policies and Procedures, Academic Grievance Procedure within the BSSW Program, Policies and Procedures for Review of Academic Performance*).

- The student has the right to appeal the decision by following the Policy on Student Appeal Procedures (see *Subchapter Z*), and/or the BSSW Program Grievance Procedures (see *BSSW Student Handbook: Policies and Procedures, Academic Grievance Procedure within the BSSW Program, Academic Grievances*).

---

**Subchapter V: Policy and Procedures on Accommodations in Field for Students with Disabilities**

If a student plans to request disability accommodations, they are required to register with Disability Services for Students, McCannel Hall, Room 190, 701-777-3425 v/tty. For information about Disability Services for Students see [http://www.und.edu/dept/dss/](http://www.und.edu/dept/dss/). If the student has medical information to share, they are to make an appointment to discuss the needs with the Director of Field Education. Once the need for accommodation(s) has been established, the Director of Field Education and/or field faculty will work with the agencies regarding implementation of the accommodations.

**Procedures for implementing the above statement:**

1. Students who request accommodations in Field Education are to contact Disability Support Services to establish eligibility for accommodations concurrent with submitting a Field Education Application.

2. Request Disability Support Services to verify in writing the student's eligibility for accommodations.

3. Students who are found eligible for accommodations by Disability Support Services will discuss the nature of accommodations needed and together with Disability Support Services submit a statement of those accommodations to the Director of Field Education.

4. Students who are eligible and request accommodations will schedule an appointment with the Director of Field Education to discuss specific accommodations as related to the nature of the field experiences and the agency sites preferred for field internship. All requests for accommodations during Field Education are to be directed to the Director of Field Education.
5. The Director of Field Education and/or field faculty, in arranging for field internship sites, will discuss with the appropriate agency personnel, the need for accommodations within the agency and within the internship experience.

6. A written understanding regarding the nature of the accommodations to be made, the payment of expenses associated with these accommodations, and the general procedures for handling accommodation related issues during the field experience will be approved in writing by the agency, the program, and the student.

7. If requests for accommodations are made after the student begins a field internship or after the student has signed the understanding regarding accommodations, the Director of Field Education and/or field faculty may need to suspend the student's field internship until such time as the student provides documentation of the need through Disability Support Services and the Director of Field Education and/or field faculty can assure that the needed accommodations can be agreed upon and provided.

8. In the event that an appropriate internship site that will offer the needed accommodations and/or internship experience that meets the standards for a field cannot be developed, the Director of Field Education and/or field faculty will in writing notify the Department of Social Work Chair, Director of the BSSW Program and Disability Support Services.

9. When faculty field liaisons are appointed, the Director of Field Education will inform the faculty field liaisons of the mutually agreed upon accommodations and procedures for handling accommodation issues within the field experience.

10. Students will be informed that, at times, there may be problems inherent to the nature of the requested field experience and/or the preferred field agency. Furthermore, students will be informed that all reasonable efforts will be made to provide accommodations within the field internship in accordance with the curricular course objectives established for Field Education.

11. Students will be informed that failure to notify the Director of Field Education and/or field faculty of needed accommodations at the time of applying for Field Education may delay entry into Field Education or may result in suspension of the current field internship.

12. Students with accommodations in field internship sites will be informed by the Director of Field Education and/or field faculty that if problems arise during the field experience (specific to accommodations or the procedures for handling additional requests for accommodations), the student is to first contact the faculty field liaison after talking with the field instructor. Subsequently, faculty field liaisons will inform the Director of Field Education of these issues and as appropriate the faculty field liaison and/or Director of Field Education will meet with the agency personnel and/or student to consider action necessary to resolve the concern.

Subchapter W: Policy and Procedures for Evaluating Students in Internship
Section 1. Evaluation Process and Content

The evaluation process is a critical part of the Field Education. In order to guide this process the BSSW Program has identified for evaluation the major course objectives, supervisory related items, and the student responsibilities required as part of the field internship. The evaluation form is incorporated into the Learning Plan and Field Evaluation for BSSW Field Education and is available in the online system.

The course objectives for BSSW Field Education reflect the BSSW curriculum content and are consistent with the knowledge, skills, and values of generalist practice, and related behaviors which are a reflection of the core competencies.

The evaluation instrument is designed so that the student must sign the evaluation to verify that the field instructor and student have had the opportunity to discuss the evaluation. The student will also be asked to self-evaluate his/her performance, both at midterm and final. The student also checks that he/she agrees or disagrees with the final evaluation. If the student disagrees with the final evaluation, in whole or part, the student may attach an explanation for the disagreement. The field instructor is asked to recommend a grade for the field internship and the faculty field liaison, after conferring with the field instructor, assigns the grade of either pass or fail.

The evaluation process is on-going and occurs throughout the semester. One of the primary times this occurs is during the supervisory sessions which take place between the field instructor and student or when the faculty field liaison visits the agency.

In addition to the evaluation process which occurs during supervisory sessions, Field Education requests that a formal, comprehensive evaluation occur twice during the field internship. These formal evaluations are completed in writing at approximately mid-semester and at the end of the semester.

A calendar of events and deadline dates is given to students during the second field orientation. It is the student's responsibility to schedule the midterm and final evaluations with the field instructor and to ensure that the evaluations are completed in the online system per the field schedule. The field internship evaluations will not be shared with those requesting references unless the student has provided the BSSW Program Field Education with written permission to do so.

Section 2. Performance Problems

It is not uncommon for students to experience difficulties in carrying out the responsibilities and assignments related to their field internship. A certain amount of problems, anxiety and stress is normal and expected if students are sufficiently challenged and stretched in their personal and professional growth. This will happen because it is common for students to encounter a certain number of human needs and problems, which activate their own personal struggles. Other situations will demand skills and intervention responses, which make them uncomfortable or create internal conflicts. Still other situations will require knowledge and
skills, which are not yet a part of the students' abilities or capacities. With support and guidance students weather these situations and become more self-aware, knowledgeable, and skilled in social work practice.

On occasion the problems and challenges for students in the field internship are significant enough that they pose a risk to the student's ability to meet obligations to clients, a risk to the agency's reputation, and/or a risk to the health of the student. Examples include: students with health problems, acute and/or chronic, too many demands on time (family, employment, school work, etc.), financial difficulties, and car problems. In these situations the field instructor, together with the faculty field liaison, has a responsibility to intervene in order to address the particular issue. If the issue is identified early and can be dealt with by planning, flexibility, and accommodations, hopefully the student can adequately cope to the extent that they are able to meet the obligations of clients and perform at an expected level of performance. It might take an extra effort on everyone's part but the student is able to remain in placement with the appropriate changes.

Sometimes the problems are such that accommodations and flexibility will not adequately address the problem. Perhaps the student demonstrates a serious skill deficiency or is experiencing personal problems to a degree that s/he is not able to satisfactorily carry out their field assignments. Maybe it involves an unwillingness to comply with agency policy or an ethical violation. In these cases the student internship may be terminated at the request of the agency, the faculty field liaison, or student. The termination policy stated earlier in Subchapter U should be followed in this situation. Additionally if the "drop deadline" is not passed and the student withdraws from the course due to reasons just described, the student will need to reapply in order to enroll in a field internship. When and under what conditions the student may apply and be readmitted to field will be based upon the findings and recommendations of the Director of Field Education and possibly the Field Advisory Committee. These recommendations will have been shared in writing with the student. There are usually several concerns in these situations. Field instructors need to protect the client's rights to adequate treatment/service. The educational and sometimes personal needs of the student need to be addressed. The gate-keeping function for the profession is also a concern. These all need to be considered while keeping adequate treatment/service to the client as the highest priority.

**Subchapter X: Ending Field Education**

As students come to the end of their field experience, it is a time to reflect on:

- Personal development during the internship.
- Thoughts and feelings as the internship wraps-up.
- How classroom learning transferred into the field experience.
- Saying good-bye and dealing with change, separation and closure.

**Final Paperwork Required to End Field**
A student’s field experience is not considered to be complete until the following forms are completed in the online system, and a final grade will not be posted until they are submitted.

1. **Request to Discontinue Field Internship**

   This form is completed and signed by the student’s field instructor and certifies that the student has completed the required number of hours as well as all of the tasks identified in the Learning Plan (see *Appendix VII. Request to Discontinue Field Internship*). The faculty field liaison also signs off on this form. This form must be completed in the online system by the due date listed on the field calendar.

2. **Final Evaluation**

   This form is to be completed by the student and the field instructor through the online system, by the due date listed on the field calendar.

3. **Student Evaluations of Field Agency, Faculty Field Liaison, and Field Coordination (3 forms completed electronically in the online system)**

   *Subchapter Y: Evaluation Forms*

   The BSSW Program seeks to evaluate the effectiveness of Field Education and improve the field internship process. As a result, students are asked to participate in the ongoing efforts to evaluate the field experience by completing these forms. These forms will be located in the student’s forms in the online system. The completed evaluations are part of the student’s final field paperwork.

   **Section 1. Student Evaluations of Field Agency**

   The Student Evaluation of Field Agency is to be completed independently by the student (see *Appendix VIII. Student Evaluation of Field Agency*). During the final supervisory session, feedback should be shared with the field instructor. The field instructor may request a copy of the evaluation. The field internship will not be considered complete until such evaluation discussions are held.

   **Section 2. Student Evaluations of the Faculty Field Liaison and Field Coordination**

   These evaluations are to be completed by the student. It is advisable that students meet with the respective faculty field liaison to provide constructive evaluation related to their field experience, if possible (see *Appendix IX. Student Evaluation of Faculty Field Liaison*). The student will also evaluate the Director of Field Education and/or field faculty involved in facilitating the student’s field internship (see *Appendix X. Student Evaluation of Field Coordination*).

   *Subchapter Z: Policy on Student Appeal Procedures*

   **Student Appeal Procedures**
A student may encounter difficulties during the semester related to a change of internship site, final evaluation, or recommended grade in the course. The appeal procedure is as follows:

1. If a conflict arises, discuss this conflict immediately with the individual with whom the conflict exists or the field instructor.

2. If a satisfactory resolution is not obtained, take the matter to the next person in the chain of responsibility. If resolution still does not occur, the student may move up to the next step. The chain of responsibility is as follows (see *Appendix XI. Field Education Communication Chart*):

   a) Field instructor

   b) Faculty field liaison

   c) Director of Field Education

   d) Department of Social Work Chair

3. In the event that resolution cannot be reached through the informal process internal to the BSSW Program, a student may utilize the formal grievance process available through the *University of North Dakota Code of Student Life*, (http://und.edu/code-of-student-life/).

IV. Personal Profile

Your answers to the following questions are helpful in evaluating your readiness to enter Field Education and in evaluating the type of field experience that may best match your particular interests and learning needs.

1. Identify and describe the strengths you will take into the social work field internship?

2. Answer A-D if applying for a BSSW internship:

   A. Describe your written communication skills:
      (How did you do on term papers and essay tests?)

   B. Describe your verbal communication skills:
      (How you did in class participation, in group meetings, and in presentations.)

   C. Describe your use of supervision:
      (Discuss your supervisory relationship with your former or your current supervisor.)
| **D. Describe your work habits:**  
* (Do you hand in assignments on time? How do you budget your time for study and personal activities?) |
<table>
<thead>
<tr>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>3. Identify and describe what you want to do with your social work degree following graduation?</strong></td>
</tr>
<tr>
<td>---</td>
</tr>
<tr>
<td><strong>4. Describe the type of Field Education and characteristics of a learning environment that would be most conducive to your learning as a social work student?</strong></td>
</tr>
<tr>
<td>---</td>
</tr>
<tr>
<td><strong>5. Describe your goals for skill and/or personal development in the field internship?</strong></td>
</tr>
</tbody>
</table>
V. Student Preferences of Agencies for Field Education

1. Prioritize your field interests, from first to last in each category, beginning with the most preferred. Please be advised that the purpose of prioritizing is to assist in the determination of a field internship site that will give you a well-rounded learning experience. Field Education is responsible for the selection of the agency to which you will be assigned.

<table>

2. Describe any requirements or preferences you have regarding geographic location. For example, identify if the internship site must be in Grand Forks, if you are able to commute to a placement daily (25-40 miles), and list any other communities you would be able to go to for the duration of the internship.

3. Describe any other considerations that you think should be considered in choosing a field internship for you. (Accommodations needed, specific requests, concerns, additional information, etc.)
VI. Request for Part-Time Internship

If applicable, please let the Director of Field Education know of your request, and indicate this on the Field Education Application.

VII. Request for Field Internship at Agency Employed

If applicable, complete the Request for Field Internship at Agency Employed form and attach to Field Education Application.

VIII. Special Section

(Please read carefully each of the following sections. Your signature below will confirm that you have read the sections.)

A. If you have a disability and desire a disability related accommodation(s) for a field internship experience you should contact the Director of Field Education to inform him/her of the accommodation(s) you require. You do not have to disclose the nature of your disability to the Director of Field Education when requesting the accommodation(s) you require. The Director of Field Education may refer you to a Disability Specialist at the Disability Support Services (DSS) office to establish eligibility for the requested accommodation(s). Once the need for an accommodation(s) has been established, the Director of Field Education will work with the agencies regarding implementation of the accommodations. You are always free to contact Disability Support Services (701-777-3425) for assistance in obtaining accommodations. Should a disability be reported after internship, there is the potential that the internship could be discontinued pending the necessary investigation of the agency’s ability to provide adequate accommodation.

B. Personal Statement and Resume

Please upload a copy of your current resume detailing educational history, work and volunteer experience, and three professional references to your student detail page. Also include your personal statement below.

C. Criminal Background Check

- All students must submit to a criminal background check prior to beginning your field internship. A criminal background investigation may include a North Dakota Bureau of Criminal Investigation check, a Federal Bureau of Investigation and or a check of another state.
  - The cost of a background check is the responsibility of the student.
  - Individuals who refuse to submit to a background check will be dismissed from the program.
  - Falsification of any information, including omission of relevant information, will result in a dismissal from the program.
  - If the criminal background check has no findings of concern, the student will be allowed to enroll and participate in her/his internship provided all other program requirements are met.
  - If the background check report reveals information of concern which the program may deem unfavorable, the student will be given the opportunity to provide a detailed written description and explanation of the information contained in the report along with appropriate documentation. This information must be returned to the Director of Field Education within 30 calendar days of the date the communication is sent to the student.
  - A faculty committee from the program will review any criminal background checks with areas of concern for social work students. The committee may request that a candidate submit additional information such as a written explanation, court documents, and/or police reports. The committee will review all available information and determine whether a student will be allowed to advance into Field Education or be dismissed from the social work program.
  - The student has the right to request a copy and challenge the accuracy of any criminal history reports ordered. The BSSW Program Field Education will not take any action that will adversely affect the student until the student has been afforded a reasonable time to correct or complete the record, or has declined to do so.
The student may appeal the program’s action based upon information in a background check. The student must submit a letter of appeal and additional information to complete or correct the record to the Office of Student Services at the College of Nursing and Professional Disciplines within 30 days of formal receipt of the decision. A committee will be convened from within the college to consider the appeal and render a final decision.

- Criminal background check reports and other submitted information are confidential and may only be reviewed by officials and designated representatives of affiliated field partners in accordance with the Family Educational Records and Privacy Act and other applicable state and federal law.

- Criminal background check information for UND students will be kept pursuant to the University of North Dakota’s records retention policy.

D. **Please be advised** that depending upon the agency where you do your internship, you may need to provide to the agency, documentation as to dates, places, and times of various immunizations.

*If you are required to receive additional immunizations, you will be responsible for the costs of the immunizations.*

E. **Please be advised** that students who in the past have engaged in behaviors beyond the scope of the Social Work Code of Ethics and who in some cases may have been adjudicated and found in violation of certain statutes need to be aware that these behaviors and judicial findings may result in the student’s inability to secure a state license to practice social work and/or may result in the student’s inability to secure a social work position following graduation. Furthermore, such behaviors and judicial actions may result in the inability of Field Education to secure a social work field internship in order for the student to adequately complete the social work degree.

Currently, a number of field agencies require potential student interns to agree to and complete a criminal background check prior to commencing a field internship with the agency. This may occur even though a criminal background check has been conducted by the program. Students planning on an internship with an agency that requires a criminal background check need to be aware that the cost of a background check is the responsibility of the student. Requests for background checks and reimbursements are handled between the student and the prospective agency. Criminal background checks may involve local law enforcement, the State Bureau of Criminal Investigation, and the Federal Bureau of Investigation.

IV. **Release of Information**

**Your signature on the following line affirms ...**

1. That you have answered this application to the best of your knowledge,

2. That you have read and understood the notifications provided in Section VIII,

3. That you give permission to the Director of Field Education, BSSW Program, Department of Social Work, and the University of North Dakota to release the following information to field instructors in field agencies being considered for your internship supervision:

   (a) your written Field Education Application,

   (b) your written resume, personal statement, and supporting materials,

   (c) verbal information related to your learning needs and academic performance,

   (d) faculty observations about your follow-through, cooperativeness, initiative, independence, reliability, verbal and written communication skills, and
(e) faculty observations about your critical thinking skills, including: the breadth, depth, and relevance of your thinking processes as reflected in written assignments, verbal participation, and interactions with faculty and students.

4. That the permission to release information given in section IV (3) above includes a consent to release records that are considered educational records under the Family Educational Rights and Privacy Act of 1974 (FERPA). Such consent is limited to those documents listed in section IV (3) above.

This information is to be shared with prospective field instructors in order to match you with the supervisor and with the agency that can best meet your learning needs and that can best help you to achieve the learning objectives for the field internship.

You can refuse to give permission or you can withdraw your permission to release information by submitting a written statement to that effect to the Director of Field Education. Please be advised that not giving permission to release information or rescinding your permission to release information may reduce the likelihood that faculty place you in a site that responds to your learning needs.

# APPENDIX II: INTERNSHIP AGREEMENT

## BSSW Internship Agreement

This document is to be completed and signed by the student and the approved field instructor after being officially notified of the match between the student and the agency. The student is expected to begin field internship on the first day of the academic semester and to be in the internship until the end of the academic semester. Students may begin and/or end the internship one week early. Under no situations will a BSSW student report less than 450 hours. The hours in the internship do not include field education seminars, travel to seminars, travel to internship site, absences, or other non-agency related activities.

APPENDIX III: REQUEST FOR FIELD INTERNSHIP AT AGENCY EMPLOYED

BSSW Request for Field Internship at Agency Employed

For BSSW students requesting a field internship in an agency where employed. Please submit this request form along with Field Education Application packet for approval by the Director of Field Education.

<table>
<thead>
<tr>
<th>Name</th>
<th>Phone</th>
</tr>
</thead>
<tbody>
<tr>
<td>Address</td>
<td>City</td>
</tr>
<tr>
<td>E-mail</td>
<td>Advisor</td>
</tr>
</tbody>
</table>

Your internship experience must be significantly different than that of your paid work. Please explain how your internship will differ from paid work done by you in the agency?

Supervision must be provided by a social worker who is not currently in a supervisory role with you in your agency, nor can they be an immediate colleague. Identify the person and title that might supervise the internship and the person who now supervises your work:

Identify the population to be served during your internship and how these differ from the populations served during work hours:

Describe how internship time will be protected from your work time:

Identify hours of scheduled work and hours for scheduled internship:

For Department Use Only

APPENDIX IV: LEARNING PLAN AND FIELD EVALUATION

BSSW Learning Plan & Field Evaluation

<table>
<thead>
<tr>
<th>Student:</th>
<th>Student ID #:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Semester/Year:</td>
<td>Permanent Non-UND Email Address:</td>
</tr>
<tr>
<td>Field Instructor:</td>
<td>Field Instructor's Phone/Email:</td>
</tr>
<tr>
<td>Agency:</td>
<td>Faculty Field Liaison:</td>
</tr>
</tbody>
</table>

This Learning Plan is based on the nine competencies students are expected to demonstrate upon finishing their internship. Each competency describes the knowledge, values, skills, and cognitive and affective processes that comprise the competency at the generalist level of practice, followed by a set of behaviors that represent observable components of the competencies. The field instructor will help the student identify practice opportunities, including timelines, related to the competency which will be identified and assessed during the semester. The behaviors are closely related to each other and may be addressed with the same internship activities. You should refer to the Learning Plan each week in supervision and update it as field activities change. Any substantive changes must be approved by the faculty field liaison.

This evaluation presents an opportunity for the student and field instructor to evaluate the student’s growth and development of the nine competency areas developed by the Council on Social Work Education. By the end of the internship, the student will have demonstrated competency in each of the following arenas of performance as a generalist social worker. For students who do not demonstrate the designated benchmark in any behavior, please indicate, in the instructor’s comments, specific plans to support student need for development in these areas. If there is a need for a remedial plan to assist the student in achieving a competency, the faculty field liaison will meet with the student and field instructor to develop the plan. Students may exceed a benchmark if they meet the criteria defined in the behaviors. The Final Field Evaluation will ask you to evaluate skill development in each of these areas.

For each evaluation item, please rate the student accordingly to the following scale:

<table>
<thead>
<tr>
<th>Score</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>No Knowledge: Student has no knowledge at all.</td>
</tr>
<tr>
<td>1</td>
<td>Knows: Student knows what is required to carry out professional functions.</td>
</tr>
<tr>
<td>2</td>
<td>Knows How: Student knows how to use the knowledge that has been accumulated and is able to verbally describe the process.</td>
</tr>
<tr>
<td>3</td>
<td>Shows How: Student demonstrates the “know how” with support and/or supervision.</td>
</tr>
<tr>
<td>4</td>
<td>Does: Student can demonstrate the behavior independently.</td>
</tr>
<tr>
<td>N/A</td>
<td>No Opportunity: Student has not yet had the opportunity to demonstrate competence in this area.</td>
</tr>
</tbody>
</table>
2.0 - Desired benchmark for first half of internship.
3.5 - Desired benchmark for second half of internship.

Comments may be made under any competency statement, if desired. Please be sure to indicate those areas in which you think the student is particularly strong and those areas that need improvement. This evaluation is intended to give the student feedback about her or his performance. Final scores will contribute to the determination of final grade (Pass/Fail).

**Competency 1.0 – Demonstrate Ethical and Professional Behavior.**

<table>
<thead>
<tr>

Your honest feedback regarding the adequacy of your pre-field orientation and field coordination is appreciated and will be helpful in making improvements.

The overall rating utilizes the following five-point scale:

5  Excellent: Far exceeds standards.
4  Very Good: Highly effective performance exceeds standards.
3  Good: Competent performance, common level attained.
2  Fair: Needs slight improvement to meet standards.
1  Poor: Needs substantial improvement to meet standards.
0  No basis for answering.

APPENDIX X: FIELD EDUCATION COMMUNICATION CHART

The faculty field liaison is the first contact for both the student and the field instructor. The Director of Field Education and the chair of the Department of Social Work are typically only involved directly in this process when there are either student performance issues, or there are problems with the field agency.
