College of Nursing and Professional Disciplines**

**Undergraduate Nursing Student  
Functional Abilities Release**

College of Nursing and Professional Disciplines undergraduate nursing students must be able to perform the functional abilities in each of the following categories with or without a reasonable disability related accommodation request: gross motor skills, physical endurance, physical strength, mobility, hearing, visual, tactile, smell, reading, arithmetic competence, emotional stability, analytical thinking, critical thinking, and interpersonal communication skills (National Council on State Boards of Nursing, 1999). However, it is recognized that degrees of ability vary among individuals. Individuals are expected to discuss questions about abilities with the Director of the Office of Student Services.

The Functional Ability Requirements for Undergraduate Nursing Students and Common Activities/Tasks Required are accessible on the College of Nursing and Professional Disciplines internet site at <https://cnpd.und.edu/nursing/bsn.html> or are available from the Office of Student Services on request. These provide a framework for relating functional ability categories and representative activities/attributes to self-limitations and accommodations.

I have read the Functional Ability Requirements for Undergraduate Nursing Students. I authorize Disability Services for Students to disclose in verbal or written form any information received regarding my request for a disability accommodation with the Director of the Office of Student Services. This release will be in effect for the duration of my academic status while a pre- or admitted nursing student enrolled at the University.
